Welcome and thank you for your interest in visiting the University of Washington!
Please read these 7 helpful tips before consulting the Drop-In Course List:

1. Registration is not required to attend classes on the Drop-In Course List.
2. Please arrive on time and remain for the entire class. Some classes are longer than others, so please be sure to check the times.
3. Please conduct yourself in a manner that will not disrupt the class or lecture. This includes turning off cell phones or other noise-making devices, providing the professor with your undivided attention and refraining from participating in lecture unless specifically encouraged to do so.
4. Room numbers and times may be subject to change throughout the quarter and cannot be guaranteed. Please verify class locations and times before your visit by checking the Time Schedule at http://www.washington.edu/students/timeschd/WIN2015/. An interactive map of campus can be found here: http://www.washington.edu/maps/.
5. The Drop-In Course List includes a small sample of UW classes. A full list of course offerings is available at https://www.washington.edu/students/crs-cat/.
6. Please do not visit any class that is taking an exam on that day.
7. Please do not visit any class that is not listed in the Drop-In Course List.
**AAS 206 Contemporary Issues of Asian and Pacific Islander Americans**  
Professor C. So  
Miller 301  
T, Th  
11:30-1:20  
Critically examines contemporary Asian and Pacific Islander American issues, ranging from the Cold War era to the present-day America. Topics include ethnic enclaves, community-building, civil rights, identity problems, family conflict, social organizations, political movements, and immigration.

**CHSTU 101 The Chicano/Mexican Ethnic Experience in the United States**  
Professor D. Pena  
Condon 109  
M, T, W, Th  
12:30-1:20  
Examines the Chicano/Mexican American experience, with a focus on past and contemporary issues of race, ethnicity, and socio-economic status.

**ARCHY 205 Principles of Archaeology**  
Professor J. Fitzhugh  
Savery 260  
M, T, W, F  
9:30-10:20  
Techniques, methods, and goals of archaeological research. Excavation and dating of archaeological materials. General problems encountered in explaining archaeological phenomena.

**ART H 202 Survey of Western Art-Medieval and Renaissance**  
Professor I. Drpic  
Gowen 301  
M, W, F  
1:30-2:20  
Emphasizes the arts of the Byzantine Empire and Western Christendom from Late Antiquity to the High Renaissance.

**ECON 200 Introduction to Microeconomics**  
Professor H. Salehi-Esfahani  
Smith 120  
T, Th  
9:30-10:50  
Analysis of markets: consumer demand, production, exchange, the price system, resource allocation, government intervention.

**ECON 201 Introduction to Macroeconomics**  
Professor D. O'Dea  
Kane 130  
T, Th  
10:00-11:20  
Analysis of the aggregate economy: national income, inflation, business fluctuations, unemployment, monetary system, federal budget, international trade and finance.

**GEOG 258 Digital Geographies**  
Professor S. Elwood-Faustino  
Sieg 134  
T, Th  
1:30-3:20  
Explores the use and societal impacts of contemporary digital spatial technologies. Focuses on internet mapping, handheld geographic technologies, location-based services, spatial applications of social media, the geoweb, and traditional GIS. Develops hands-on experience using online digital spatial tools for geovisual representation, and skills for evaluation/critique of digital data and maps.

**HSTAM 112 The Medieval World**  
Professor C. Urbanski  
Gowen 301  
T, Th  
1:30-3:20  
Political, economic, social, and intellectual history of the Middle Ages.
HSTAA 212 The Military History of the United States From Colonial Times to the Present
Professor N. Roberts  Johnson 102
M, W  9:30-11:20
Development of American military policies, organizational patterns, tactics, and weaponry, from beginnings as a seventeenth-century frontier defense force to the global conflicts and military commitments of the twentieth century. Interaction and tension between need for an effective military force and concept of civilian control of that force.

JSIS 201 The Making of the 21st Century
Professor J. Lucero  Guggenheim 220
M, W, F  2:30-3:20
Provides a historical understanding of the twentieth century and major global issues today. Focuses on interdisciplinary social science theories, methods, and information relating to global processes and on developing analytical and writing skills to engage complex questions of causation and effects of global events and forces.

LING 100 Fundamentals of Grammar
Professor C. Surek-Clark  Kane 210
M, W, F  8:30-9:20
Introduction to basic grammatical concepts and terminology. Specifically intended for students planning to take a foreign language or linguistics.

LING 200 Introduction to Linguistic Thought
Professor L. McGarrity  Kane 210
M, W, F  2:30-3:20
Language as the fundamental characteristic of the human species; diversity and complexity of human languages; phonological and grammatical analysis; dimensions of language use; and language acquisition and historical language change.

PHIL 100 Introduction to Philosophy
Professor C. Marshall  Kane 210
T, Th  9:00-10:20
Major philosophical questions relating to such matters as the existence of God, the foundations of knowledge, the nature of reality, and the nature of morality. Approach may be either historical or topical.

POL S 201 Introduction to Political Theory
Professor J. Turner  Savery 260
T, Th  12:00-1:20
Philosophical bases of politics and political activity. Provides an introduction to the study of politics by the reading of a few books in political philosophy. Organized around several key political concepts, such as liberty, equality, justice, authority, rights, and citizenship.

POL S 202 Introduction to American Politics
Professor M. Francis  Smith 120
M, W  9:00-10:20
Institutions and politics in the American political system. Ways of thinking about how significant problems, crises, and conflicts of American society are resolved politically.
**POL S 203 Introduction to International Relations**  
Professor J. Caporaso  
Smith 120  
M, W, F  
10:30-11:20  
The world community, its politics, and government.

**PSYCH 101 Introduction to Psychology**  
Professor J. Brown  
Kane 120  
M, T, W, Th, F  
12:30-1:20  
Surveys major areas of psychological science. Core topics include human social behavior, personality, psychological disorders and treatment, learning, memory, human development, biological influences, and research methods. Related topics may include sensation, perception, states of consciousness, thinking, intelligence, language, motivation, emotion, stress and health, cross-cultural psychology, and applied psychology.

**PSYCH 200 Comparative Animal Behavior**  
Professor M. Beecher  
Kane 110  
M, T, W, Th, F  
11:30-12:20  
Research methods and findings of comparative animal behavior, their importance to an understanding of human behavior; rationale for study of behavioral differences/similarities between animal species, behavior viewed as part of adaptation of each species to its natural habitat.

**SOC 110 Survey of Sociology**  
Professor J. Wender  
Guggenheim 220  
T, Th  
3:00-4:20  
Human interaction, social institutions, social stratification, socialization, deviance, social control, social and cultural change.

**ESS 100 Dinosaurs**  
Professor R. Martin  
Kane 130  
M, W  
12:30-1:20  
Biology, behavior, ecology, evolution, and extinction of dinosaurs, and a history of their exploration. With dinosaurs as focal point, course also introduces the student to how hypotheses in geological and paleobiological science are formulated and tested.

**ESS 106 Living with Volcanoes**  
Professor M. Harrell  
Smith 120  
M, W, F  
2:30-3:20  
Explores volcanoes and volcanic eruptions on Earth and in the solar system. Examines how volcanoes work and how they affect the environment, life, and human societies. Illustrates principles using local examples of recent volcanism and ancient examples of mega-eruptions. Evaluates the possibility of predicting future eruptions.

**ATM S 101 Weather**  
Professor D. Wilton  
Kane 210  
M, T, W, Th  
10:30-11:20  
The earth's atmosphere, with emphasis on weather observations and forecasting. Daily weather map discussions. Highs, lows, fronts, clouds, storms, jet streams, air pollution, and other features of the atmosphere. Physical processes involved in weather phenomena.
ATM S 111 Global Warming: Understanding the Issues
Professor D. Hartmann  
Kane 220  
M, T, W, Th  
11:30-12:20  
Includes a broad overview of the science of global warming. Discusses the causes, evidence, future projections, societal and environmental impacts, and potential solutions. Introduces the debate on global warming with a focus on scientific issues.

ENVIR 100 Environmental Studies: Interdisciplinary Foundations
Professor Y. Weng  
Kane 210  
M, W, F  
9:30-10:20  
Introduces environmental studies through interdisciplinary examination of the ethical, political, social, and scientific dimensions of current and historical environmental issues. Integrates material from different disciplines, and applies insights and methods to actual problems and situations at scales from the local to the global.

OCEAN 102 The Changing Oceans
Professor M. Nuwer  
Kane 110  
M, T, W, F  
1:30-2:20  
Historical case studies of research on the ancient oceans, deep-sea exploration, climate change and the oceans, and human impacts on marine life. Students consider societal factors affecting progress in marine science, changing popular attitudes toward the oceans, and key current policy implications of marine science.
